Who we are...

Willis Re

MANAGING EXTREMES

Willis Group

- Found in 1828 by Henry Willis
- About 17.000 employees in more than 400 offices
- Headquartered in London

Willis Re

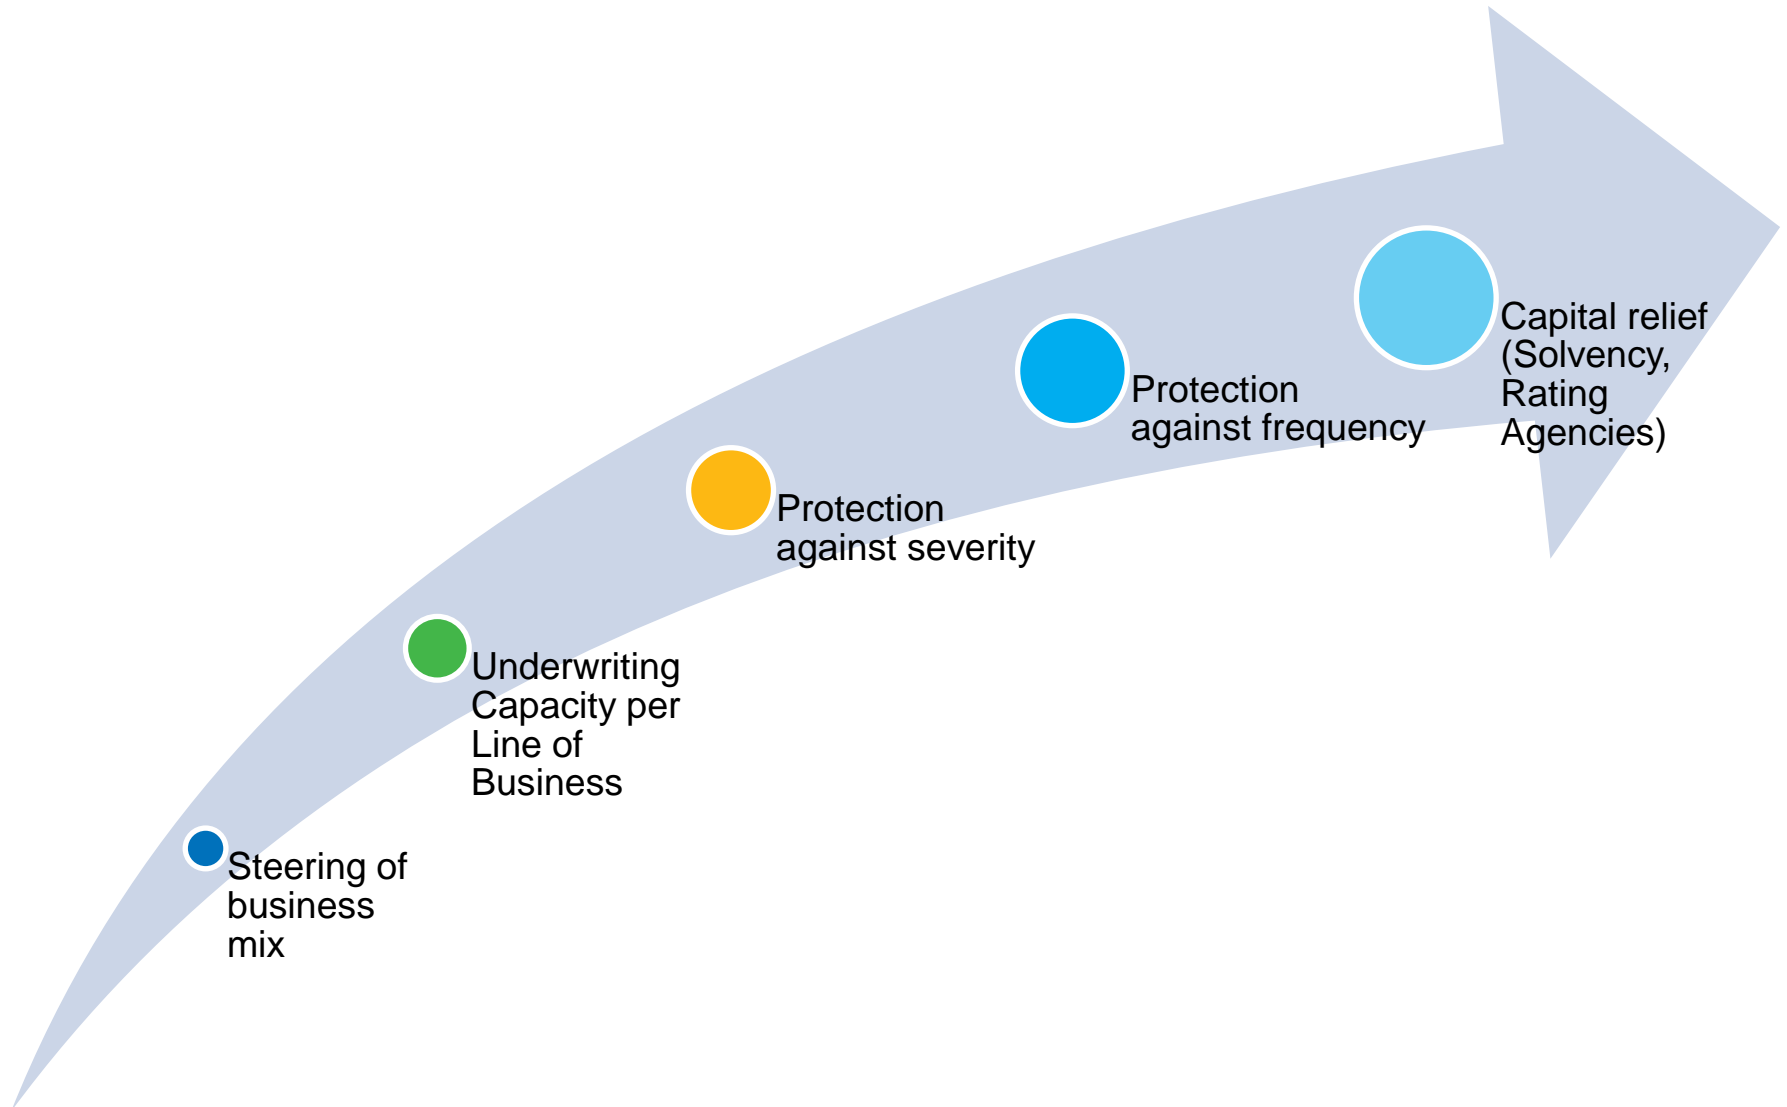

- One profit centre (Willis Re Europe)
- Global knowledge, local expertise
- Integrated Analytics
- No outsourcing

Reasons of buying reinsurance

Willis Re

MANAGING EXTREMES

Old ways of buying reinsurance

- Bottom up approach:
 - Capacity required by underwriting team per line of business
 - Max SI/PML sets the limit of the per risk severity protection
- Top down approach:
 - Stop Loss/Aggregate covers to limit the overall loss
 - Capital relief mainly from NatCat programmes, based on Cat modelling
 - Bouquet placements in order to negotiate portfolio benefits

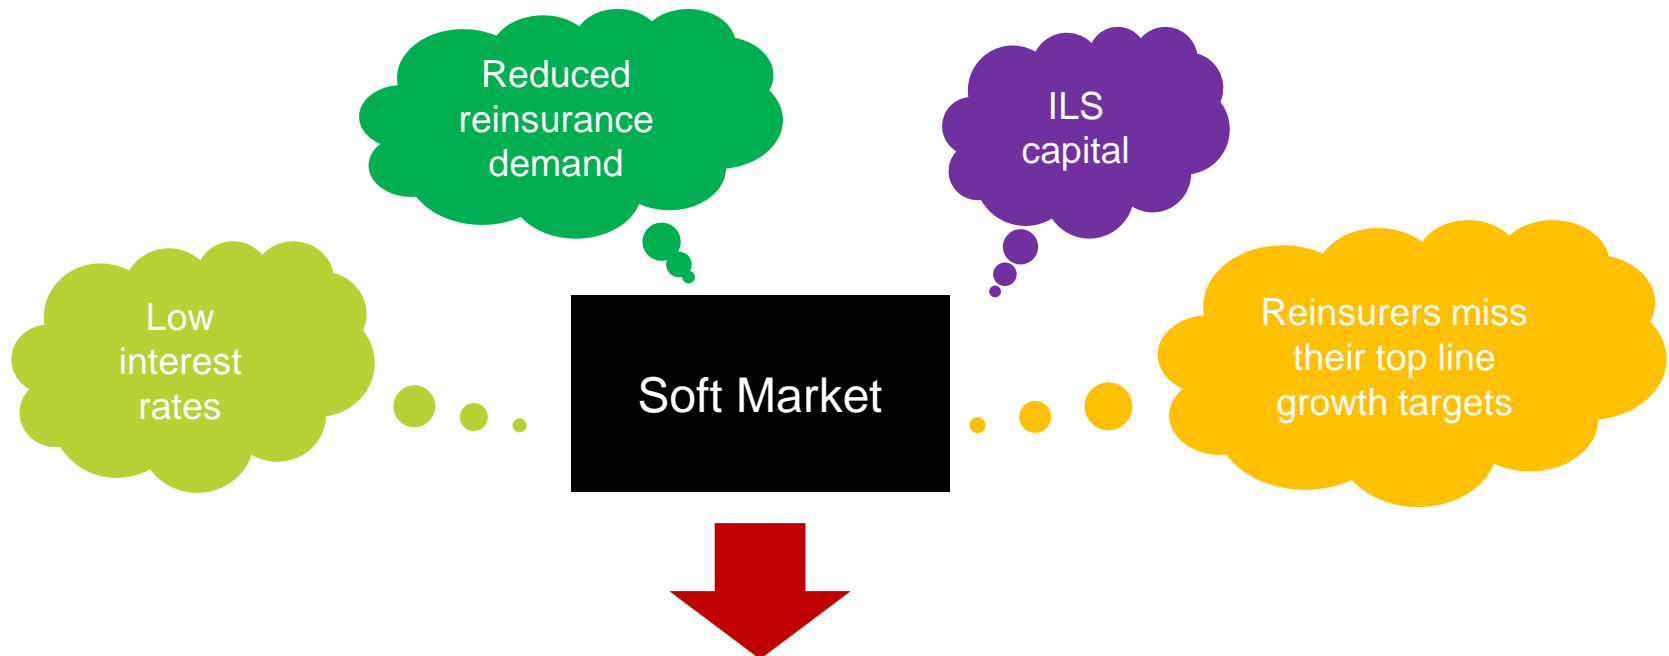

What has changed?

- Solvency II becomes (partly) effective at 1/1/2016
- ORSA/FLAOR requires a quantification of significant types of risk
- Many companies built internal models, even if they do not use them for Solvency reporting
- Companies became part of large groups, underwriting results and Solvency/Rating matters are no longer the only area of concern

European insurers created an
ERM environment!

Value
Based
Management

What else?

The world is changing faster than ever...

What's the aim?

MANAGING EXTREMES

Existence

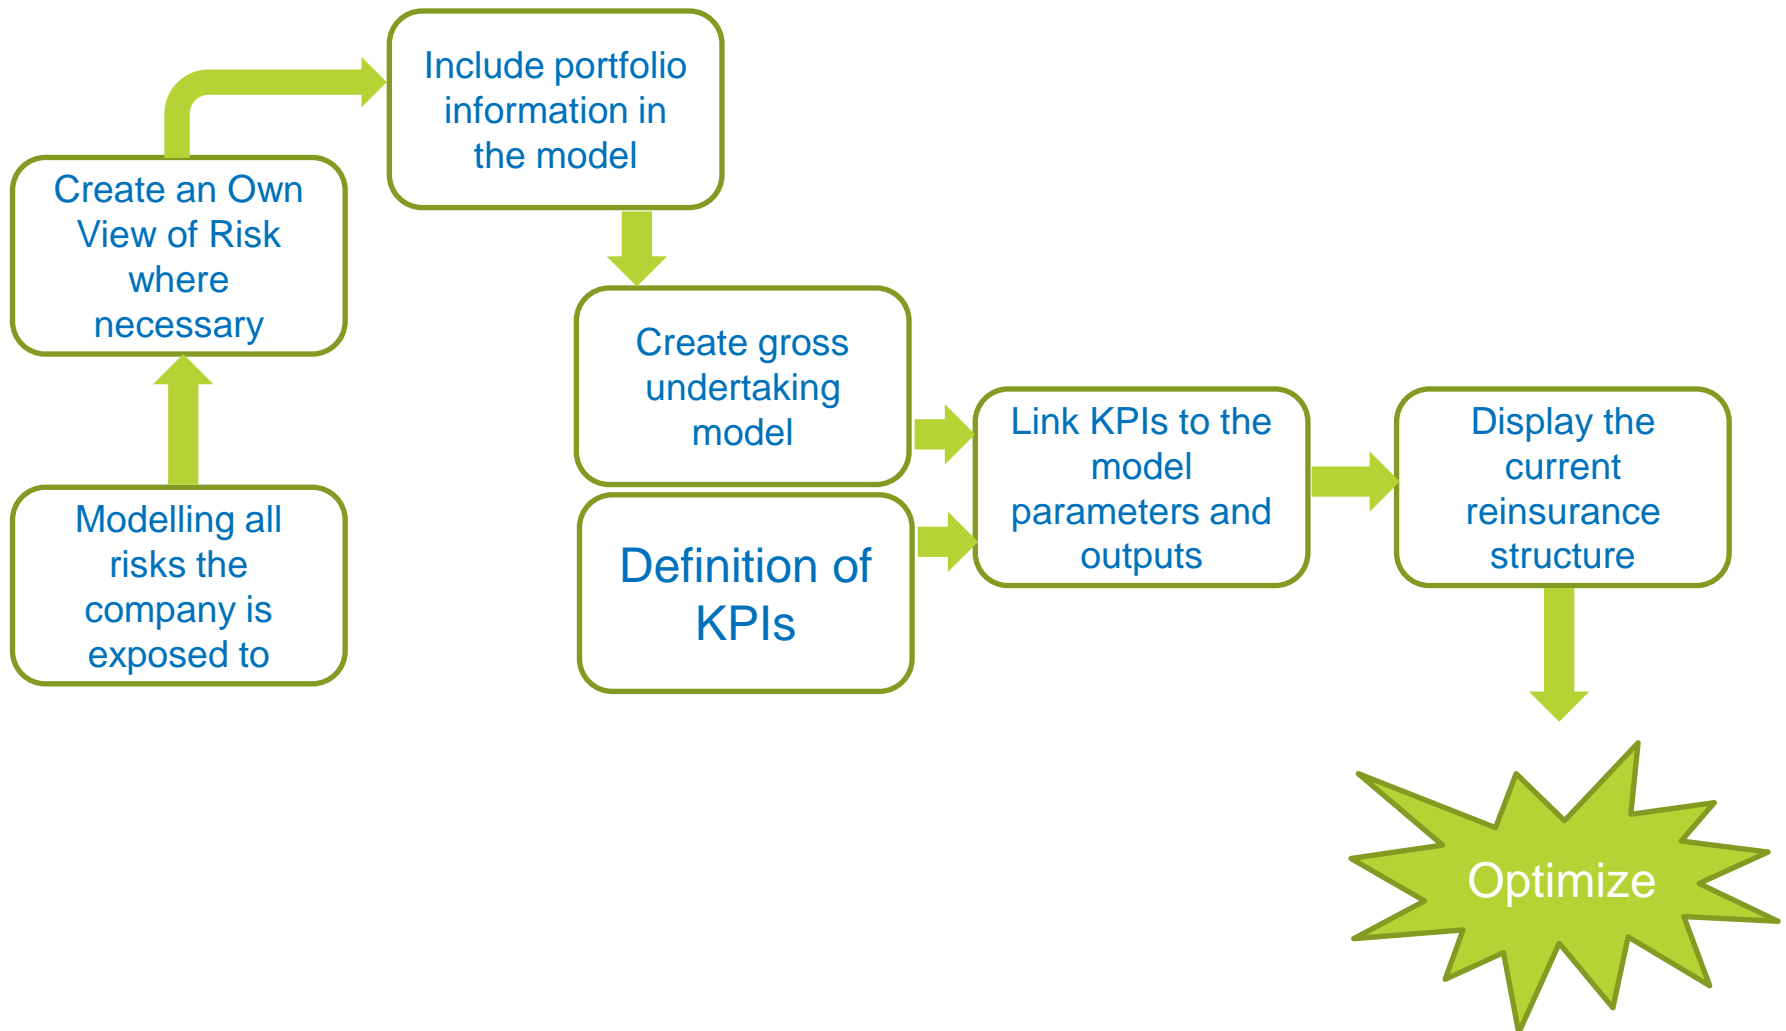

Result

Competition

Definition of KPIs

How to select the reinsurance strategy?

Optimize – but how?

Adding risk measures means adding dimensions!

mu/sigma plot

Example: Maximize Underwriting result with 1 in 200 VaR not higher than xyz

3 KPIs

Example: Maximize Underwriting result, SCR-ratio not lower than 150%, Probability of RORAC per LoB lower 4% below 1%

Key Facts

- Online-based R/I optimisation
- Developed by Willis Re
- No software distribution, internal tool
- Focus on R/I modelling, no platform for internal models

The screenshot displays the Willis iFM ONLINE interface. At the top left, it shows the version (13.1) and release date (22-Jan-2014). The main navigation menu on the left includes sections like 'Manage Willis iFM', 'Select Client', 'Gross Losses', 'Optimize Reinsurance', 'Charts & Tables', 'Client Preferences', 'Losses', 'Firm Order Terms', 'Disclaimer', and 'Help'. The main content area is titled 'Select Client and Year of Analysis' and features a 'Recent Client History' table with columns for client name and year. Below this is an 'Existing Client Selection' form with dropdowns for 'Client' and 'Year'. There are also buttons for 'Clear History', 'Create New Year for Client', 'Create New Client?', and 'Change User Type?'. Three colored boxes (green, blue, and pink) are overlaid on the interface, labeled 'User A', 'User B', and 'User C' respectively, with arrows pointing to specific elements in the 'Recent Client History' table and the 'Existing Client Selection' form.

Solution: Action Strategies

KPI	Effect of strategy on KPIs					Probability of hitting target			
	Gross	Net Var 1	Net Var 18	Net Var 32	Target	Gross	Net Var 1	Net Var 18	Net Var 32
Average ROE	36,00%	25,00%	30,00%	27,00%	ROE > 24%	99,00%	52,00%	94,00%	87,00%
Expected underwriting result									
1 in 5 years	68.169.199	63.194.233	61.668.651	62.978.956	UW Result > 60m	80,00%	61,00%	53,00%	58,00%
1 in 10 years	25.214.617	41.815.787	28.098.995	36.961.114	UW Result > 30m	30,00%	80,00%	42,00%	60,00%
SCR	132,30%	183,00%	154,00%	170,00%	SCR > 150%	0,00%	100,00%	100,00%	100,00%

Key Performance Indicator	Situation 1	Situation 2	Situation 3
Growth	Stable	Stable	Decreasing
Expected Underwriting Result	Stable	Stable	Stable
Expected Investment Result	Strong	Normal	Normal
Own Funds	Strong	Strong	Low
Rating Capital	Strong	Strong	Normal
Solvability	Good	Good	Okay
Goal	Less underwriting risk, increase excess capital	Increase retentions	Strengthening of capital base, keep security (rating)

What do we get?

- Action plan for different scenarios in a fast changing economic environment.
- An optimized current reinsurance strategy, focussed on the aim of hitting multiple company targets (Plan A)
- Alternative reinsurance strategies, focussing on different scenarios with changed KPI weightings (Plan B, C, D...)
- Willis Re can help you developing these strategies...

...and we deliver!
